# **Contents**

About the Technic Acknowledgment	
PART 1	Creating and Managing Projects
CHAPTER 1	Integrated Development Environments
	Why Use an IDE?
	NetBeans vs. Other IDE Tools5
	Summary 7
CHAPTER 2	Installing and Customizing NetBeans9
	Downloading Files9
	Installing the NetBeans IDE and Core Add-Ons9
	Customizing the NetBeans JVM Startup Options10
	Setting a Proxy11
	Checking for Updates
	Using the Update Center
	Installing Previously Downloaded Modules
	Activating Features Through the Module Manager
	Customizing the IDE
	Setting the Internal Web Browser
	Setting Code Editor Indentation
	Choosing Fonts and Colors
	Configuring Keymaps
	Setting Advanced Options

	Navigating the IDE26
	Projects Window
	Files Window
	Runtime Window27
	Navigator Window27
	Source Editor
	Output Window
	Properties Window
	Palette Window
	Summary
CHAPTER 3	Creating a Java Project
	Creating a Java Application29
	Working in the Projects Window
	Source Packages31
	Test Packages33
	Libraries33
	Test Libraries
	Working in the Source Editor
	Displaying Files34
	Line Numbers
	Code Folding
	Current Line Highlighting35
	Code Syntax Error Highlighting
	Annotation Glyphs and the Error Stripe
	Arranging Files in the Source Editor37
	Working in the Files Window38
	Importing Projects and Code
	Creating a Java Project from Existing Sources
	Importing an Existing Project from Eclipse40
	Importing an Existing Project from JBuilder42
	Building HelloWorld.java42
	Adding Java Files to a Project
	Compiling and Running the Project43
	Summary

CHAPTER 4	Creating a Web Application Project45
	Creating a Web Application45
	Navigating the Web Application Project48
	Web Pages49
	Configuration Files
	Server Resources
	Adding Web Application Files49
	Adding HTML Files
	Adding CSS Files52
	Adding Deployment Descriptors
	Adding JSP Files
	Leveraging Struts60
	Adding Struts Support60
	Adding Forms62
	Adding Actions63
	Configuring Struts65
	Building a Web Application65
	Cleaning and Building a Project
	Compiling JSP Files
	Repeating and Stopping Builds67
	Running a Web Application67
	Defining Java Application Servers
	Using Tomcat
	Using the Sun Java System Application Server
	Using JBoss
	Using BEA WebLogic
	Setting Advanced Server Options
	Setting the Application Server for a Project
	HTTP Monitoring
	Enabling the HTTP Monitor
	Using the HTTP Monitor
	Exploring the Sample Web Projects
	Summary

CHAPTER 5	Creating Visual Web Applications: JSF, Ajax, and Data Binding	83
	Getting Started with the VWP	83
	Installing the WP	
	Configuring VWP Options	
	Creating a Visual Web Application	
	Creating a Visual Web Application Project	
	Navigating the Visual Web Application Project Structure	
	Setting Project Properties	92
	Navigating the Visual Web Application Project Layout	93
	Building a Project	96
	Running a Project	97
	Using VWP Themes	98
	Customizing Themes	98
	Importing the Modified Theme	
	Using the Page Navigation Tool	
	Defining Navigation Rules	
	Using the Page Navigation Window	
	Working with JSF Components	
	Setting Component Properties	
	Setting Component Event Handlers	
	Working with the Table Component	
	Working with Ajax-Enabled Components	
	Installing the Ajax Components	
	Adding the Component Library to a Project	
	Using the Ajax Components	
	Data Binding	
	Binding to an Object	
	Binding to a Database Table	
	Binding to a Drop-Down List	
	Working with the Visual Database Query Editor	
	Summary	130
CHAPTER 6	Creating Java Enterprise Projects	131
	Creating an Enterprise Application	131
	Creating an Enterprise Application Project	131
	Navigating the Enterprise Application Project Structure	134

	Creating an EJB Module
	Creating an EJB Module Project
	Navigating the EJB Module Project Structure 139
	Working with Session Beans140
	Working with Message-Driven Beans
	Creating an Enterprise Application Client
	Verifying an Enterprise Project152
	Working with Persistence153
	Creating a Persistence Unit
	Understanding the persistence.xml File 155
	Creating an Entity Class156
	Creating JSF Pages from an Entity Class
	Summary 164
CHAPTER 7	Creating Web Service Projects: JAX-WS, SOA,
	and BPEL
	Installing the Enterprise Pack
	Using the Bundled Application Server
	Using a Preinstalled Application Server
	Skipping Application Server Installation
	Creating Web Services
	Creating a Web Service
	Creating a Web Service Client
	Creating a Web Service from a WSDL File
	Creating a Message Handler
	Creating a Logical Handler185
	Working with SOA and BPEL
	Creating a BPEL Module Project
	Creating the BPEL Process File
	Navigating the BPEL Design Window
	Creating the WSDL File
	Navigating the WSDL Editor
	Working with the BPEL Designer and the BPEL Mapper 194
	Creating a Composite Application
	Creating a Composite Application Project
	Setting Composite Application Project Properties 203
	Adding a JBI Module
	Testing the Composite Application and BPEL Process 204
	Summary

CHAPTER 8	Creating UML Projects	207
	Setting UML Options	207
	New Project Properties	208
	Presentation Properties	
	Round-Trip Engineering Properties	211
	Navigating the UML Project Layout	212
	Palette Window	212
	UML Documentation Window	213
	UML Properties Window	215
	UML Design Center Window	215
	Diagram Editor	
	Choosing a UML Project Type	
	Creating a Platform-Independent Model Project	
	Creating a Java-Platform Model Project	
	Reverse-Engineering a Java Project	
	Working with Model Elements	
	Adding Model Elements	
	Filtering Model Elements	
	Working with UML Diagrams	
	Creating Class Diagrams	
	Creating Activity Diagrams	
	Exporting Diagrams	
	Working with Design Patterns and Requirements	
	Working with Design Patterns and Requirements	
	Applying a Pattern	
	Creating Design Patterns	
	Importing Requirements	
	Generating Model Reports	
	Summary	
	ouninary	2
PART 2	The NetBeans Coding Experience	•
CHAPTER 9	The Source Editor	247
	Arranging and Navigating Files	247
	Accessing Source Editor Options	
	The Source Editor Context Menu	
	The Source Editor Toolbar	
	Source Editor Keyboard Shortcuts	255

### **About the Author**

**ADAM MYATT** currently works as the Principal Technologist of Software Development for GE Global Research, the worldwide R&D headquarters of General Electric, located in Niskayuna, New York. Adam is an experienced Java developer, with Sun Microsystems Certified Java Programmer certification. His work entails leading globally developed Java software and web applications through a rigorous software development life-cycle process, researching new technologies, and setting long-term strategies.

Adam is an active participant in a local Java users group and an avid enthusiast of open source software. He has also worked for several software firms prior to joining General Electric. Adam is a graduate of the Computer Science department at the State University of New York College at Potsdam.

In what little free time he has, Adam enjoys traveling to new and interesting places, fishing, and playing poker. He also enjoys working on his house and driving his wife crazy by talking about work nonstop.

### **About the Technical Reviewer**

**SUMIT PAL** has about 12 years of experience with software architecture design and development on a variety of platforms, including J2EE. Sumit has worked in the SQL Server Replication group while with Microsoft for two years, and with Oracle's OLAP Server group while with Oracle for seven years.

Along with certifications like IEEE-CSDP and J2EE Architect, Sumit also has an MS in Computer Science from the Asian Institute of Technology, Thailand.

Sumit has a keen interest in database internals, algorithms, and search engine technology. He has invented some basic generalized algorithms to

find divisibility between numbers and also invented divisibility rules for prime numbers less than 100.

Currently, Sumit loves to play as much as he can with his daughter. He also likes to swim and play badminton.

### **Acknowledgments**

would like to thank the many people without whom this book would not have been possible. A team of very dedicated people greatly assisted me in creating this work.

First, I want to thank my editor, Steve Anglin, for bringing me together with Apress for this project and taking a chance on me. His advice and guidance in this project were invaluable.

I want to express sincere gratitude to my project manager, Beth Christmas, for working ever so hard to keep me on schedule and on time. Her experience and professionalism helped make the book writing process far easier than it might have been.

Thanks to my technical reviewer, Sumit Pal, who helped make this a stronger, more accurate book. You have my appreciation for all your insightful suggestions and comments.

A huge thanks goes out to my copy and production editors Marilyn Smith and Katie Stence for the fantastic job they did on making what I wrote actually read well and look good. Marilyn somehow made sense of my ramblings and helped organize my thoughts to make the excellent book this turned out to be.

I greatly appreciate the entire Apress team and all the efforts of its members.

I would also like to express my thanks to the entire GEGR ITMS organization for the support at work. Balancing work and personal projects can be difficult at times, but having a great team to work with certainly made it easier.

There have also been several people and groups during my academic and professional career that have imparted their wisdom on me in one way or another. Thanks to Dr. John Dalphin, all the past and present CIS faculty at SUNY Potsdam, the CIS Board of Advisors, Chris Thompson and Anthony Debonis from my old shadow IT organization, and the CDJDN.

Finally, I would like to express my heartfelt thanks to my wife, Morgan, who put up with me working nights and weekends on this book for far too long. Her love and support during this project made it all possible.

### Introduction

his book explores the many features of NetBeans IDE 5.5. Developers can focus on a variety of technologies and areas when learning NetBeans. With the latest release, developers have access to an impressive array of features for working with JavaServer Faces (JSF), Ajax, Unified Modeling Language (UML) modeling, Enterprise JavaBeans (EJB 3.0), the Java Persistence API, web services, Business Process Execution Language (BPEL), and more. I wanted to write a book that really showcased the fantastic tools for working with these technologies.

Pro NetBeans IDE 5.5 Enterprise Edition is designed for all levels of developers. Whether you are new to NetBeans, a student programmer, or an experienced professional, you will find this book provides direct explanations of features and straightforward examples. It also focuses on many of the core features of NetBeans that assist professional software developers: Ant, JUnit, Concurrent Versioning System (CVS), Subversion, the developer collaboration tools, code coverage, and so on.

My personal web site, www.ProNetBeans.com, contains a variety of content, such as Java and NetBeans news, articles, tutorials, and more. It will also contain updates, corrections, and errata to this book. If you have any questions or would like to provide feedback, please feel free to contact me at adam@pronetbeans.com.
